## CNG Conversions

MidBox offers a secure and convenient location to house the CNG tanks for F-150, 5.4L. Situated between the cab and flatbed, the low profile, seamless appearance allows for easy access for installation or maintenance.

CNG Van Conversions on E-350 5.4L dedicated with a complete selection of van interiors.

For fleets running service bodies, we provide a durable solution. This body has a transverse compartment that will easily house the CNG conversion kits when paired with the right chassis.

Before placing your Chassis order, please contact Steelweld's CNG team to assist in ordering decisions.

For an existing fleet, Steelweld will work with you in determining whether or not a conversion would be viable for that model and assist in obtaining the correct kit.

Steelweld is experienced in the installation of all current CNG conversion kits.
